HAULICKING" ON THE GOLD COAST.

To the Editor of "The Mining World and Engineering Record."

Sir,—I have been in the habit of reading with interest your paper, and I have no doubt that your correspondence and comments are of great value to the mining industry. However, I would like to express my concern regarding the current situation on the Gold Coast.

Recently, there has been a significant increase in the cost of labor, which has put a strain on the mining operations. I understand that the miners are demanding higher wages, and I am concerned about the impact this will have on the industry.

I have heard that there is a possibility of a strike, which would be disastrous for the mining companies. I urge all parties to negotiate in good faith and avoid any actions that could lead to a stoppage of work.

In conclusion, I hope that the mining companies and the government will work together to find a solution that is fair to all parties involved.

Yours faithfully,
